

Flushing baby wipes is costing all of us in Maine big bucks.

**Be a part of the solution:
place used baby wipes in the trash...
every single time!**

Flushing baby wipes can cause toilet overflows, expensive plumbing repairs, clogged pumps and sewer systems, and expensive damage to septic systems. Baby wipes are not designed to be flushed. Sooner or later they'll get stuck, either in your home plumbing or your town's sewer system.

- At home, baby wipes can clog your plumbing, leading to messy toilet overflows and costly repairs.
- Even more serious, they also clog pumps and damage sewer systems, which costs us all big bucks.

Baby wipes can clog your plumbing, leading to messy toilet overflows and costly repairs. Even more serious, they also clog sewers and damage pumps, which costs us all big bucks.

Portland Water District spent \$4.5 million in 2009 to install screen systems to prevent clogging of pumps like this by baby wipes and other items that should not be flushed.

Find Save Your Pipes on:

Save Your Pipes is a project of INDA®, the Association of the Nonwoven Fabrics Industry and Maine Wastewater Control Association (MWWCA) to address the growing problem of consumers flushing baby wipes. This pilot campaign is intended to educate consumers about the issue and change behavior to avoid costly repairs both in homes and public sewer systems, and serve as a model for other wastewater entities across the country.
